

# the right solution

## answers for your product

Developing your new product is faster using drug delivery solutions from Baxter. We have the broadest portfolio of containers available, and the experience to solve manufacturing problems before they happen.

## global manufacturing

With manufacturing facilities in more than 30 countries, on 5 continents, Baxter can produce your new product in the ideal location to meet your market.

## regulatory relationships

Approvals can cause severe delays, costing you money, and delaying treatment for patients. Baxter has established relationships with regulators in more than 50 countries, and can help you move your product through approvals more quickly.

## accelerated development

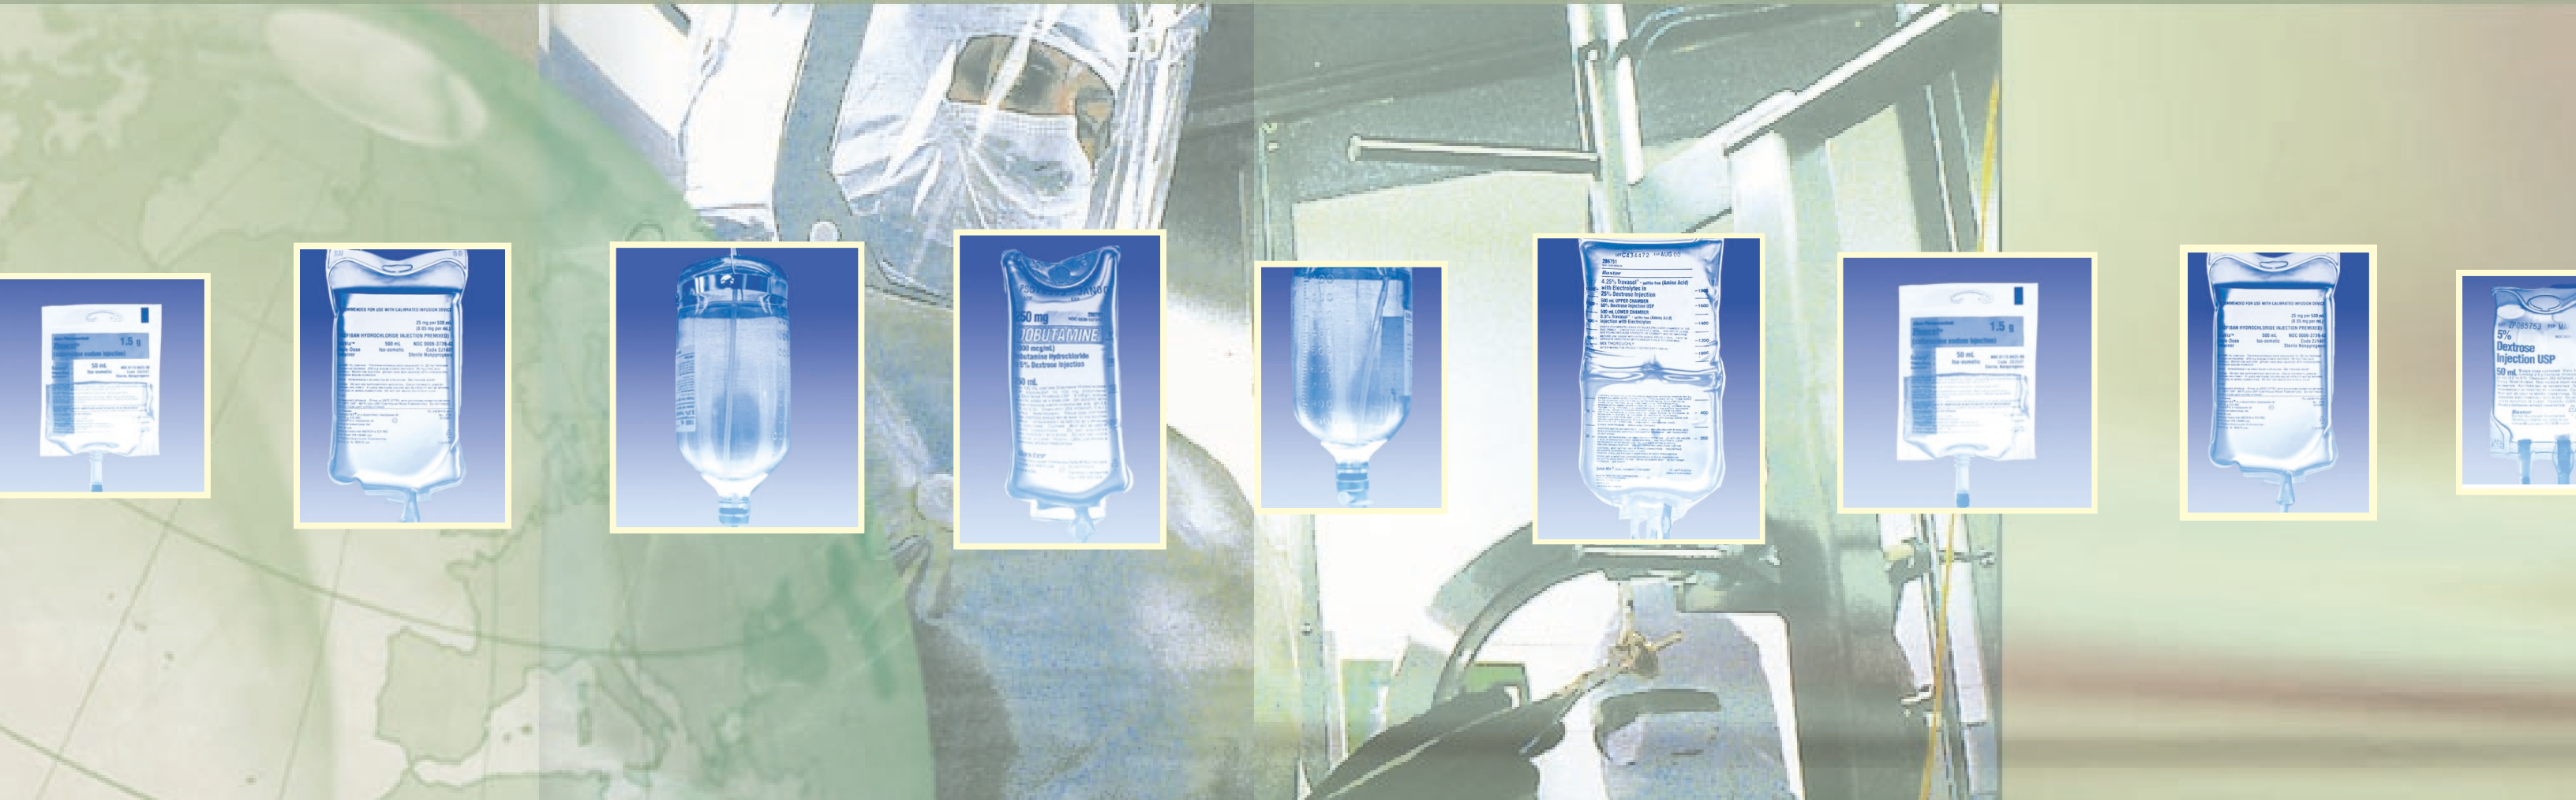

Baxter's global capabilities and resources streamline your path to market and maximize rapid penetration.

Let us show you how we've developed programs and delivered solutions for some of the biggest IV drugs on the market. For more information call us.
